Technische Universität Dresden (TUD), as a University of Excellence, is one of the leading and most dynamic research institutions in the country. Founded in 1828, today it is a globally oriented, regionally anchored top university as it focuses on the grand challenges of the 21st century. It develops innovative solutions for the world's most pressing issues. In research and academic programs, the university unites the natural and engineering sciences with the humanities, social sciences, and medicine. This wide range of disciplines is a special feature, facilitating interdisciplinarity and transfer of science to society. As a modern employer, it offers attractive working conditions to all employees in teaching, research, technology, and administration. The goal is to promote and develop their individual abilities while empowering everyone to reach their full potential. TUD embodies a university culture that is characterized by cosmopolitanism, mutual appreciation, thriving innovation, and active participation. For TUD, diversity is an essential feature and a quality criterion of an excellent university. Accordingly, we welcome all applicants who would like to commit themselves, their achievements, and productivity to the success of the whole institution.

The Boysen-TU Dresden Research Training Group for young researchers from Engineering, Social Sciences, Arts, and Humanities, co-financed by the Friedrich and Elisabeth Boysen Foundation and the Technische Universität Dresden, is offering a doctoral scholarship from January 1, 2023, for a maximum of 3 years, subject to available funding. The interdisciplinary Research Training Group, in what is its fourth generation, is conducting research on the overarching topic Hydrogen Economy - Strategic element of a future GreenGas deal. It consists of four clusters. Cluster F: Impact H2 green combines five sub-projects (SP). A suitable person (m/f/x) is being sought to work on the topic SP F1: Technological-systemic impact of the hydrogen economy. The Chair of Energy Process Engineering at the Faculty of Mechanical Science and Engineering at TU Dresden is responsible for the supervision. The interdisciplinary supervision takes place in the common rooms of the Research Training Group.

Abstract: In a first step, sub-project F1 analyzes the technological-systemic impact of the further expansion of renewable energies (RE) (wind and PV) for a green hydrogen economy. In a second step, the raw material requirements for the further expansion of RE are determined. For this purpose, sustainability concepts as well as concepts for the recycling and for applicable processes and plants are developed. In the third step, the direct interaction of wind and PV plants with each other and with the environment is investigated. For this purpose, thermodynamic evaluations of exemplary wind and solar projects are used as an example of a reference energy park in southern Germany, taking local conditions into account. The interaction with the other four sub-projects within Cluster F is essential here.

Applicants are expected to have an above-average university degree in engineering or natural sciences with profound knowledge of thermodynamics, fluid mechanics, and/or meteorology/climatology, as well as a high degree of willingness to engage in interdisciplinary work and research.

Accepting the scholarship obliges your presence in the research group's offices in Dresden on three fixed core days per week. Participation in the college's teaching program is compulsory (24 ETCS in 3 years).

TUD strives to employ more women in academia and research. We therefore expressly encourage women to apply. The University is a certified family-friendly university and offers a Dual Career Service. We welcome applications from candidates with disabilities. If multiple candidates prove to be

---

1 The amount of the scholarship is based on the basic amount according to DFG criteria: [https://www.dfg.de/foerderung/programme/einzelfoerderung/forschungsstipendien/stipendienrechner/](https://www.dfg.de/foerderung/programme/einzelfoerderung/forschungsstipendien/stipendienrechner/)
equally qualified, those with disabilities or with equivalent status pursuant to the German Social Code IX (SGB IX) will receive priority for employment.

Please send your compelling application including a letter of motivation, curriculum vitae, copies of academic certificates or other relevant qualifications (language certificates, further training), and a max. 10-page sample text (e.g. final thesis, term paper, or publication) until November 21, 2022 (stamped arrival date of the university central mail service applies) with the subject “SP F1: Technological-systemic impact of the hydrogen economy” preferably via the SecureMail Portal of the TU Dresden https://securemail.tu-dresden.de as one PDF document to anna.martius@tu-dresden.de. Alternatively, applications can also be sent to the following address: TU Dresden, Boysen-TU Dresden-Graduiertenkolleg, Frau Dr. Anna Martius, Helmholtzstr. 10, 01069 Dresden, Germany

Please submit copies only, as your application will not be returned to you. Expenses incurred in attending interviews cannot be reimbursed.
