Technische Universität Dresden (TUD), as a University of Excellence, is one of the leading and most dynamic research institutions in the country. Founded in 1828, today it is a globally oriented, regionally anchored top university as it focuses on the grand challenges of the 21st century. It develops innovative solutions for the world's most pressing issues. In research and academic programs, the university unites the natural and engineering sciences with the humanities, social sciences, and medicine. This wide range of disciplines is a special feature, facilitating interdisciplinarity and transfer of science to society. As a modern employer, it offers attractive working conditions to all employees in teaching, research, technology, and administration. The goal is to promote and develop their individual abilities while empowering everyone to reach their full potential. TUD embodies a university culture that is characterized by cosmopolitanism, mutual appreciation, thriving innovation, and active participation. For TUD, diversity is an essential feature and a quality criterion of an excellent university. Accordingly, we welcome all applicants who would like to commit themselves, their achievements, and productivity to the success of the whole institution.

The Boysen-TU Dresden Research Training Group for young researchers from Engineering, Social Sciences, Arts, and Humanities, co-financed by the Friedrich and Elisabeth Boysen Foundation and the Technische Universität Dresden, is offering a doctoral scholarship from January 1, 2023, for a maximum of 3 years, subject to available funding. The interdisciplinary Research Training Group, in what is its fourth generation, is conducting research on the overarching topic **Hydrogen Economy – Strategic element of a future GreenGas deal**. It consists of four clusters. **Cluster G: Electrocatalysts for a competitive hydrogen economy** combines three sub-projects (SP). A suitable person (m/f/x) is being sought to work on the topic **SP G3: Ensure education for sustainable development and understanding of the processual nature of scientific and technical research through research-oriented teaching-learning concepts and science communication**. The academic supervision is organized by the Chair of Construction, Wood and Paint Technology and Interieur Design/Vocational Didactics at the Faculty of Education at TU Dresden. The interdisciplinary supervision takes place in the common rooms of the Research Training Group.

**Abstract:** In order to make hydrogen efficiently usable as an energy carrier, it is essential to develop highly effective and cost-effective catalyst materials that catalyze the electrode reactions in fuel cells and electrolyzers, in particular the cathodic oxygen reduction in the generation of energy from hydrogen. This research and development project is an excellent example of processes of sustainable development, which is why it is being used as a reference point for the development of prototypical research-oriented teaching modules for subject-specific teacher training and for practical courses for pupils in the teaching-learning laboratory of the TU Dresden. The modules have a model character in the sense of Education for Sustainable Development, they serve teacher training and further education in this area, and can thus be transferred to the reference object "Energy Park in Southern Germany". In addition, a concept for science communication will be implemented.

Applicants are expected to have an above-average academic degree in a teaching degree in a science or vocational subject, in communication sciences, or psychology, and a high degree of willingness to engage in interdisciplinary work and research. Accepting the scholarship obliges your presence in the research group's offices in Dresden on three fixed core days per week. Participation in the college's teaching program is compulsory (24 ETCS in 3 years).

TUD strives to employ more women in academia and research. We therefore expressly encourage women to apply. The University is a certified family-friendly university and offers a Dual Career Service. We welcome applications from candidates with disabilities. If multiple candidates prove to be

---

1 The amount of the scholarship is based on the basic amount according to DFG criteria: [https://www.dfg.de/foerderung/programme/einzelfoerderung/forschungsstipendien/stipendienrechner/](https://www.dfg.de/foerderung/programme/einzelfoerderung/forschungsstipendien/stipendienrechner/)
equally qualified, those with disabilities or with equivalent status pursuant to the German Social Code IX (SGB IX) will receive priority for employment.

Please send your compelling application including a letter of motivation, curriculum vitae, copies of academic certificates or other relevant qualifications (language certificates, further training), and a max. 10-page sample text (e.g. final thesis, term paper, or publication) until November 21, 2022 (stamped arrival date of the university central mail service applies) with the subject “SP G3: Ensure education for sustainable development and understanding of the processual nature of scientific and technical research”, preferably via the SecureMail Portal of the TU Dresden https://securemail.tu-dresden.de as one PDF document to anna.martius@tu-dresden.de. Alternatively, applications can also be sent to the following address: TU Dresden, Boysen-TU Dresden-Graduiertenkolleg, Frau Dr. Anna Martius, Helmholtzstr. 10, 01069 Dresden, Germany.

Please submit copies only, as your application will not be returned to you. Expenses incurred in attending interviews cannot be reimbursed.
